Whether for grouping your vegetables and flowers, or recoloring ... Always a uniform, clean finish.

Tape grouper Obimaru® Max Vegetable Binder

- **Light handle operation**
Max's very own tape gripping roller makes tight binding easy with little effort. Perfect for those with a weak grip and the elderly.
- **Excellent durability!**
Employs a gear-supported, direct tightening method. Very robust against failure due to vegetable scraps and soil. Can be used for a long time with high confidence.

Easy, manual type HT-M2

Product specifications

| | |
|------------------------|---|
| Product name | HT-M2 |
| Item number | HT91018 |
| JAN code | 4902870 060305 |
| External dimensions | 150 mm (W) x 457 mm (L) x 460 mm (H) |
| Weight | 7kg |
| Binding method | Flat elliptical bundling via palm depression |
| Binding method | Single manual action via adhesive tape |

Consumables

Post-harvest cleanup is quick and easy! Tape that decomposes in the sunlight Photolysis tape

① The tape increases in strength as the crop grows

After you apply the tape, it will gradually increase in strength (holding power) via chemical changes induced by sunlight. In this way, the tape will have holding power when it is necessary, providing firm support for branches beyond that of normal tape.

② After the harvest, the tape starts to crack and deteriorate

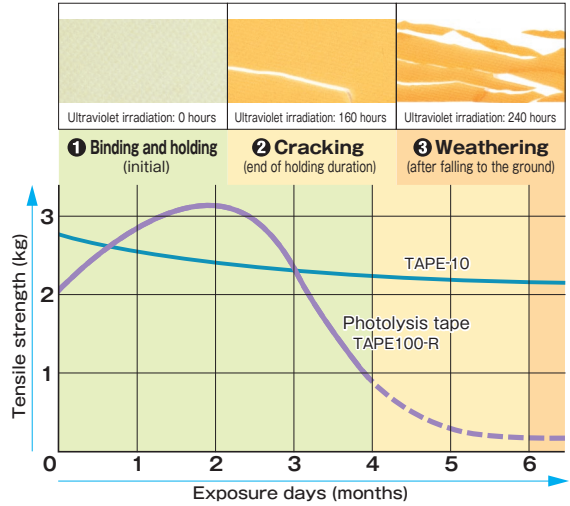

After you finish harvesting, it is easy to remove the branches from whatever you taped them to (branch supports, shelves, nets, etc.) with just a little force (about the same you would use for normal tape).

* Decomposition speed will vary with actual sunlight conditions (in the shade, in a greenhouse, etc.)

- TAPE100-R**
1 box (pack of 10)
Thickness: 0.1mm
Width: 11mm, Length: 38m
Tape color: cream
Holding duration: from 5 to 10 months
Main application: grapes (Delaware), cucumbers
- TAPE200-R**
1 box (pack of 10)
Thickness: 0.2 mm
Width: 11 mm, Length: 19 m
Tape color: pale green
Holding duration: from 3 to 6 months
Main application: tomatoes
- TAPE200-L**
1 box (pack of 10)
Thickness: 0.2 mm
Width: 11 mm, Length: 19 m
Tape color: pink
Holding duration: from 6 to 10 months
Main application: grapes (medium and large seed varieties), kiwifruit

[Decomposition of 100-R tape for grapes (Delaware)]
Testing using a sunshine weather meter (condition: temperature 60°C)

Base tensile strength (time-series change)
● Tensile strength (Wkg) represents the breaking strength when pulled

Apply where you do not need tape to decompose. Choose photolysis tape or non-decomposing tape depending on use for smarter results!

New Product

Non-Decomposing Tape for Tapener

- Does not decompose in sunlight to conveniently secure plants in place year-round.
- Best choice for off harvest season or when tape decomposition is unwanted.
- Large volume at a reasonable price!

- TAPE-10VP**
1pack (20 rolls)
Thickness: 0.1mm
Width: 11mm
Length: 40m
Tape color: white
Product code: TP91041
JAN code: 4902870836566
- TAPE-15VP**
1pack (20 rolls)
Thickness: 0.15mm
Width: 11mm
Length: 26m
Tape color: blue
Product code: TP91043
JAN code: 4902870836573

In-store Promotional Tool

● Required pole sold separately.
